

Michael Linnell & Co Ltd

LINNELL'S AUTO LEVELLING DUAL USE TROLLEY

MANUFACTURED
IN THE UK

More than just another trolley...

The Patented ergonomic design provides the user with a roll container to meet the demands of fast moving and changing operations, eliminates the need for different trolleys or pallet trucks and will increase productivity while generating a better working environment.

The only trolley you will need

From the experience gained over many years of providing working solutions to our customers the Auto Levelling Trolley was designed.

A multipurpose fixed or mobile container designed to minimise operator strain whilst increasing productivity, efficiency and generating a better working environment.

With the platform lids closed use as a standard trolley with the advantage of auto levelling for transporting items such as parcels, boxes, sacks etc.

A simple operation opening the platform lids and attaching the stowaway packet bag converts the trolley into an auto levelling packet receptacle bag ideal for conveyor loading / unloading, pick & pack operations, small items, packets etc. together with easy access from front, back or top.

COMPANY HISTORY

We are a family run company with over 45 years' experience in Mail Room product manufacturing & supply.

As a Royal Mail Award-winning First-Class Supplier over the last 35 years we are the current sole supplier of Royal Mail Delivery Satchels, Franked Mail Meter Pouches and Reusable Tamper Evident Pouches and Seals.

Our customers include, TNT, UK Mail, Secured Mail, Jersey Post, Asda, HSBC, Hong Kong Post, Clipper and River Island.

Our product range also covers mailroom design including Cad and 3D images, to equipment for collection to delivery from standard stock items to specially designed projects with a full sample making service.

The only trolley you will need...
